

To whom it may concern,

Alfaseed Ltd is a family-run company located in the eastern part of Hungary. The company is active in contracted and licensed seed production and distribution in Hungary and across Europe and N-African companies.

During the previous years we were building up trust and reliability among our partners which results sales for 350.000ha scale in all of the crops for 2019/2020 season.

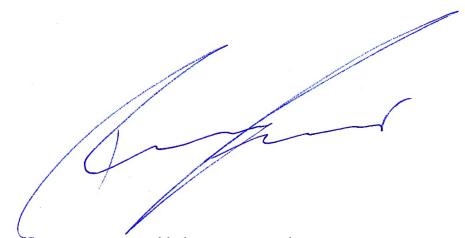

Expanding our activities we decided to implement new crops into our portfolio from 2020. For this we are looking for partners who are willing to provide genetic material for exclusive testing in the EU countries. We are willing to take actions in EU registrations and field testing.

We are looking for:

- corn hybrids, grain and silage types FAO300-400, FAO400-500
- -corn hybrids for grits production >8% protein and floating:75-85
- sunflower hybrids with imidazoline or SU herbicide resistance with early-mid maturity and high disease resistance
- high-oleic sunflower hybrids
- mid maturity winter oilseed rape hybrids
- sorghum grain, silage and sudangrass hybrids
- sudangrass varieties
- green lentil varieties with yellow cotyledon

If you are interested in EU testing of the above crops please do not hesitate contacting us.

Yours sincerely

Miklos Fazekas  
General manager
